### **Southern Pine Beetle Prevention Program**

#### **Project Plan and Application for 2023 Funding**

Funding associated with USDA Forest Service grant: 23-DG-11083105-004

Landowner:	Practice:	
	Forestry Division	
County:	Personnel Name:	

The purpose of this plan is to achieve two main objectives: 1) provide sound forest management recommendations that will enable you to maintain a profitable and sustainable stand of timber and 2) effectively manage the hazard and spread of southern pine beetle and Ips bark beetles by putting an increased emphasis on a proactive approach. Thinning is known to effectively lower the risk of pine bark beetle infestations.

Thank you for allowing the Arkansas Department of Agriculture - Forestry Division (Division) to assist in the management of your property. The Division must review the program information below with the Southern Pine Beetle Prevention Program (SPBPP) applicant.

#### Both parties understand and agree that:

- 1. Participants in the SPBPP projects must:
  - a. Be eligible landowners— non-industrial private landowners, groups, small corporations, part-time forest product manufacturers,
  - b. Have at least 10 contiguous acres of pine, and
  - c. For thinning practices, have an estimated stand-wide basal area of greater than 120 feet squared per acre of pine.
- 2. Any thinning done prior to approval of this SPBPP Application will **not** be eligible for cost share.
- 3. In the event the U. S. Forest Service or Congress shall fail to appropriate adequate funds for the continuance of this program, then this agreement and all the responsibilities of the Arkansas Department of Agriculture Forestry Division herein shall cease.

### **Division Obligations**

- 1. Ensure that all pages of this SPBPP Project Plan and Application is properly completed and signed.
- 2. New Requirement!! A timber sale agreement will be required for thinning practices before an application will be approved. The agreement should have the landowner and logger names, acres of harvest, and a length of the contract (i.e., a completion date).
- 3. Ensure that a **W-9 Form** is properly completed with landowner's Social Security Number or Federal Employee Identification Number listed along with the landowner's signature.
  - a. Determine payment division/percentage if there is more than one landowner involved, such as family co-owners. If more than one payment is to be made, ensure that all intended recipients have completed a W-9 Form.
- 4. Visit the property upon completion of the project to conduct a final assessment and to finish the SPBPP Project Completion Summary. After the site visit, this completed SPBPP Project Plan and Application, thinning agreement, SPBPP Project Completion Summary, W-9, and any paperwork that documents project expenses (such as invoices) will be sent to the SPBPP Program Manager in Little Rock. When received, the reimbursement will be made in the form of a check mailed to the landowner.

Cost Share Allocation (To Be Completed Only by the Forestry Division)
, , , , , , , , , , , , , , , , , , , ,
The following is the practice and cost share requested by the Forestry Division (See SPBPP Guidelines for rates):
Requested Incentive Rate Cost Share Practice: Acres: (or NTE Rate): Requested:
\$ \$
Logger Incentive (allowable for FCT and chipping with 40 acres or less):
Allocation Approval (To Be Completed Only by SPBPP Program Manager)
The above project is approved and, if properly carried out according to the SPBPP Description & Plan, will qualify for cost share payments offered by the Forestry Division through the program.
